

# Chinese Checkers

## CONTENTS

Wood Gameboard, 60 Wood Pieces, Cloth Drawstring bag.

## OBJECTIVE

This game can be played with 2 to 6 players. The object is to move all your pegs across the board to the triangle opposite of your starting point. The first player to do so wins.

## TO BEGIN

If you have an even number of players, each player should select a triangle opposite from another player. If you have 3 people, players should start out in every other triangle. Each player chooses a color and arranges their 10 pegs on the Home triangle, filling it completely.

## HOW TO PLAY

Players take turns advancing their pegs, in any direction. You may move one marble only one space at a time, except when you jump. You may jump any number of times, including in a zig-zag pattern. When jumping, you can go over either your own pegs or your opponents pegs. If you jump over an opponent's, you do not remove that marble from the board.

You must move all your pegs across the board. You may not leave one peg behind in Home to block your opponents. If you do, then you automatically lose the game.
