

# Tumbling Tower

## CONTENTS

54 Bamboo blocks.

## OBJECTIVE

Remove one block at a time from the tower and the stack it on top.  
The last player to stack a block without making the tower fall wins the game!

## TO BEGIN

Empty the blocks onto a flat surface.  
Build the tower.

## HOW TO PLAY

The player who built the tower goes first.

Play passes to the left.

Carefully remove a block from anywhere below the top of the tower using only 1 hand and place that piece on the top of the tower.

As you proceed to move all the pieces the tower starts to become looser and the weight of the tower will shift.

You can touch other pieces of the tower to find a loose piece that you can move.

When stacking your pieces on the top part of the tower make sure you complete a 3 block story before starting a higher one.

Your turn ends 10 seconds after you stack your block or as soon as the player to your left touches another piece.

Keep removing and stacking the blocks until someone topples the tower.

If you're  
the last player to stack a block without toppling the tower, you win!
