

## Speedway Auto Racer Directions

Put the cars on the track so they go clockwise. An extra car is included in case one is lost or gets damaged. Put the Key in the top of the motor house and wind up the Speedway.

There is an ON-OFF Switch on the side of the house. You may have to move the switch handle up a little to move it to the ON position.

You can change the position of the cars while they are racing. Simply hold the rim of the track for a second with your hand. This will change the positions of the cars.

Thank you for your purchase.

We hope you will enjoy your Speedway Auto Racer for years to come.
